

**SUNSET COFFINS®**

# Crafted with care in Cam

Sunset Coffins are created with very strong board made entirely from 100% recycled newspapers sourced from a local paper mill less than a mile away. They are crafted using traditional techniques, and the absence of any plastic or metal ensures that they are totally biodegradable.

Sunset Coffins are available in eight colours with a warm, velvety finish.

We would be delighted to see you at our workshop and showroom. Let us know when you're dropping in and we'll put the kettle on!

*"I have to say that the best thing about that funeral was the very feminine lilac coffin – an abiding and beautiful, reassuring image from a very sad occasion."*
